STARK INDUSTRIES S.H.I.E.L.D.

S.H.I.E.L.D. OVERSIGHT DIVISION

REDACTED LEVEL 10

MIG/SCIC-A

[redacted] DATE1

CLASSIFIED: LEVEL 10

MEMORANDUM FOR **SCIC-A/10**

SUBJECT: PRELIMINARY REPORT ON NANO INTEGRATION PROTOCOL

1. Mission Summary: On [redacted], I was granted access to Stark Industries' f Laboratory division under direct authorization from [redacted]. The purpose of this visit [redacted] observe and assess emerging technologies currently under development.

"NANO TECHNOLOGY"

2. Initial Observation: The system consists of a neural-embedded chip paired with nanomlecular agents capable of integrating directly into the human body.

- This is not assistive technology.
- It is not medical support.
- It is not restoration.

IT IS REPLACEMENT.

The system overrides natural biological processes and substitutes them with synthetic control protocols.

- Cellular behavior is no longer organic.
- Damage is not healed, but rewritten.
- The body ceases to function as an organnism.

It becomes a PLATFORM.

3. Subjective Encounter. During my time in the facility. I engaged directly with [redacted] who presented **Tony Stark,** who presented the intended application.

- "With this… we can perfect them."
- "They can become soldiers – better than CAPTAIN AMERICA."
- "They will heal… like DEADPOOL."
- "They can merge with machines… like CYBORG."

He then concluded with. "We can make them gods."

6. Critical Risk. If deployed, this technclogy will not remain optional.

- It will become: **THE STANDARD**

Those who refuse integration will be viewed as:
OBSOLETE

5. Directive. I strongly advise immediate termination of this project.

CANCEL THIS. IMMEDIATELY.

— DR. HENRY PYM
FORMER LEAD RESEARCHER
STARK INDUSTRIES

CANCEL THIS. IMMEDIATELY.
